***Project***

Do you want to be part of the development and start-up of one of Canada's premier mining operations? We are looking for dynamic individuals to join our team and live in our community as we pursue this exciting project. The Rainy River Project, located 65 km northwest of Fort Frances, ON, contemplates a combined open pit and underground mine, processing 21,000 tonnes per day.

***Department***

Engineering

***Tasks***

Reporting to the Chief Engineer, the Mine Technician – Survey ensures safe and efficient survey services by generating accurate designs, plans and measurement data that provide critical mining information to operators and development results to engineers to support the successful development of the Rainy River Project.

The initial schedule will be 7 days on, 7 days off and the successful candidate will be expected to relocate to Northwestern Ontario to live and be an active part of our community.

The specific role responsibilities of the Mine Technician – Survey include but are not limited to the following:

- Lead the survey team and mentor, coach and support the professional development of Engineers-in-Training and other team members performing survey activities;
- Prioritize, organize and plan assigned survey jobs;
- Prepare, distribute survey reports and plans and provide data to the management team regarding development and production
- Oversee the survey team activities and ensure effective grade line mark-ups, instrument setups, diamond drill setups,
- Other responsibilities required to meet our business needs and ensure the successful development of the Rainy River Project.

### ***Requirements***

- 5+ years' experience in surveying and providing mine technical support preferably for a surface mining operation
- Successful completion of a two-year Mining Technology Diploma or other relevant Engineering Diploma.
- A combination of education and experience may also be considered.
- Previous experience in a supervision role leading a small team is ideal
- Experience using mining software including Mine Sight is an asset
- Previous drill and blast experience and surveying is desirable
- Proficient use of MS Word, Excel, Access, SAP, LIMS
- A strong willingness to learn and take on added responsibility
- Well-developed communication and organization skills
- Work in a team environment to meet deadlines
- Positive attitude and commitment to safety
- Exceptional oral and written communication skills with internal and external contacts
- Ability with work with others in a team environment

### ***Contract Type***
